SCITOS – Read Me First

Date: 2013-06-14

Starting to use your new SCITOS robot

Together with your new SCITOS robot, you should have received the following documents:

- SCITOS – User Manual:

  This documents describes the main components of the robot. Please read it carefully, before using the robot.

- SCITOS – Quick Start Guide:

  This document contains a brief overview of the specific configuration of your robot. Furthermore, it describes how to start working with MIRA and CogniDrive.

- SCITOS – MIRA Installation Guide:

  This document describes the necessary steps for a fresh installation of MIRA and CogniDrive. Since the software is already installed on the robot, you should keep this document for further references.
  Furthermore, you find some links to the online documentation of MIRA and the most important tools of MIRA.

Furthermore, you should have received a USB memory stick, which contains
- the above mentioned documents as PDF files,
- a recovery image of the root partition of the embedded PC,
- your license file, and
- the SCITOS configuration file of your robot.

Mailing list for news and updates

For announcements of updates, new releases and other important MIRA news we provide a mailing list:

        news@mira-project.org

We strongly recommend to subscribe to this mailing list:

        http://www.mira-project.org/mailman/listinfo/news

FAQ

For questions regarding MIRA an online forum is available on the following URL:
